Alright guys, so we're going to be troubleshooting the Heisinger, if we miss some things. We're just going to put it both together, if I miss the leg and if I miss the arm, we're going to put those both together. Okay, so I'm here, I go inside, and for some reason I lose this leg. The only thing you can do is kind of, I keep the pressure here. The only thing you can do is really kind of walk away from me. So I'm going to sit up, keeping my pressure on this shoulder. I'm going to grab around his waist, and now the hook, this knee, is on the shoulder. It's going to become my bottom hook as I take this foot, scoot away, and take my position. Alright, I break this off, keep the pressure, grab. For more information, visit www.FEMA.gov
