Okay, I already teach the darts, finishing on top, but sometimes when I'm on top, somehow my opponent gonna manage me and putting me down. So let's say that I'm here. Here, you're gonna lay down, lay down. Let's try the darts. Other side. Here. We're gonna get the darts. Okay, as soon as I get the darts, he's gonna start opening up his elbow. Okay, so come here, let's see a better angle so the camera can see. Lay down. I have the darts. I have the darts, I'm gonna use my chest on top of his thighs. But somehow he's gonna start opening up his elbow, and now he's gonna create more time to release, to breathe. He's gonna have to create more time to breathe. And now the bottom arm that he has, he's gonna start placing on the mat. He's gonna start placing on the mat and go, and now he's gonna start turn in the turtle position, okay? From here, I don't wanna let go of the darts. I'm still in very good position, and I don't wanna miss this opportunity to finish the fight. So from here, what I want to do, I want to turn. I'm gonna keep turning and be on bottom, okay? But from here, what I cannot do, I cannot let him push the mat, because for him to escape from the darts, what he want to do, he want to pass this elbow to another side. But to pass his elbow to another side, he gotta start putting weight on top of my chest. So I'm here, let's say that he's gonna start like, pushing the mat, pushing the mat, and now he gonna start bring his elbow to another side, okay? But come back, Rodrigo. Try to use more your back, if you don't, on top of me. Okay, yes, exactly. That's what he wanna do, because he gonna create more space. Come back. I'm here, he gonna start pushing the mat, and bring his elbow to another side, and now I miss the opportunity to finish the fight. Here. Yeah. So I'm gonna be here. As soon as I get here, okay, and he's gonna start like going sideways, going sideways, I know that he want to start putting weight on top of me. To avoid him bringing his elbow to another side, I have to trap his leg. As soon as I trap his leg, he's not gonna be able to start pushing the mat. Okay, from here. From here, I know that he want to start pushing the mat. So before he start doing that, I'm gonna start walking towards his leg, and as soon as I start walking towards his head, you see I'm gonna start pushing down his shin against his chest, and then I'm gonna start putting even more pressure on the choke. I'm gonna be here, try to stop working. I'm gonna start walking towards him, and now I'm gonna use my elbow to bring my elbow to his chest. And now I'm gonna use one of my legs to trap one of his legs. Okay, as soon as I trap his legs, now it's gonna be like almost impossible for him to escape from the darts. Now try to push the mat. He cannot. Now I'm here in the good position. Now I just gotta keep my arms in place, and squeeze, and got the finish.
