All right, so this is the last technique that we're going to go over on top and it's from the close under again So going to go on your back So fast forward through the giggler 2.0. We finally end up on top with the close under Falling onto our side Heel toe all the way up pushing the knee off Getting to mount here Now from here my balance is one one two here Now from here i'm going to stay here for a little bit and let the person try to escape because It's going to be very difficult So from here i'm going to go ahead and set up a trap for him. I'm going to actually let him get his arm out so from here See how his elbow is going to start to swim towards the underhook and then he's going to go ahead and get it out Go ahead and get it out Here that's what i'm trying to give him Get back a little bit So i'm going here Blocking that escape Pushing up letting this go in front of me now freeze So this moment right here is critical Once he gets his elbow out It's out it's over Okay So when I get up Drop Onto him here. So now his arm is trapped Okay, this will be a good opportunity for you to reach underneath his head Grabbing his wrist And getting the gift wrap here Okay now pretty much immobilized Now from here i'm going to bring my other hand through Getting the kimura grip or the figure four grip here Okay Now I can stay here cook the guy a little bit or I could bring my knee underneath his head Sit down onto my butt and pull him on top of me getting the hooks So i'll be here I sit Pulling up up on top of me Getting the hooks here On this side So everything from the beginning I hit the gator 2.0 I bring him over close under start using the passing sequence Here i'm completely safe I let him try to escape Drop so I just drop my chest right onto his tricep From here i'm going to fish For his wrist if he's extending it And I can't reach I could always just pass it Hand goes to the back to secure Now from here i'm going to go ahead and step my leg up and drop my knee underneath my elbow Now from here i'm just going to go ahead and sit Pull him up And then this leg will transfer into the second hook here
