So pretty much once I clear the guy's neck, then I got I got action, you know, the guys, the guys in bad shape, you know. So once I clear the neck, I'm gonna be looking for that foot, right. But guys who either know the game or have good instinct and start tucking that chin out. If I can't get to my foot, I'm just gonna lift the chin strap the guy and for the chin strap, I got a front roll, you know. So once I clear the neck, boom, that foot's not available. I'm just getting up to my elbow, chin strapping, front rolling, and then I'll get everything together right there, right. So I'm gonna have that chin strap and I'll show right now eventually I got to go to a collar tie over my foot so they can't push the foot back over. So it's gonna look something like this. So we're here. I'm gonna have him in butterfly or cocoon position. Boom, my butterfly's in. Flipping this leg up and we're here, right. So I want the blade of my wrist under the guy's neck, right. But sometimes guys are already tucking that chin, yeah. So I can either wait, be patient right here, or I could clear the neck. I'm gonna clear the neck right here, boom. Yeah, and then this foot's really not available for whatever reason. You could even be grabbing the foot. Whatever it is, it's just not available, right. So from here or if you push down on this foot with his left hand, yeah, if he's there then maybe I can't really get a hold of that foot. So what I'm gonna do is I'm gonna lift the chin strap right here, right. I'm gonna build up to my forearm and then again I'm gonna start front rolling. And then right when I land right here, if he pushes this foot over his head and turns back into me, then we're back here again, right. So right away, right when I land right here, I got to bring this elbow over top my foot and collar tie the guy, right. Once I collar tie, I'm gonna readjust back to the foot. Yeah, he would have his, he would have his hand right about there. I got to punch that wrist off and then again we're back in two things and we got action, right. But the main thing, once I'm chin strapping and rolling right here, I don't want him pushing this foot over, so I got to bring this arm over right away. So he can't push that over, collar tie. If I need to make an adjustment because I'm losing that arm, I can. I'm gonna go back to this big toe and I can't just push his hand off right here. The guy's too strong. I'm gonna have to punch that hand off, keeping his hand high, getting right here, right. So one more time. Flipping that leg up right away. Stiff arm, clear catch. Yeah, once I realize the angle is bad and I can't really get to that foot for whatever reason, I'm chin strapping, getting up to my forearm and front roll. And so I'm gonna go here, get up to that forearm and start front rolling right away. And right here I'm already clamping on his hip, going over that foot, collar tying, and then making that adjustment. Then we're here again.
