There's a very cool move that's very similar to a calf slicer because it is a calf slicer but it's a little different it's like a modified calf slicer we like to call it the sneaky kamikaze because it is what it is you're just going for it out of nowhere it comes and it's very dangerous because you're going all in and you know you're going to get a lot of damage done so the way we attack the sneaky kamikaze is essentially a no-handed attack you really use your legs you got to rely on your footwork all right so it's all about your footwork paying attention to the details of what my legs do this is what's going to be crucial in this transition right here okay so let's start out the pre-hook we're here you got a nice pre-hook there step over boom i go here and i'm here all right now a lot of times you're trying to stretch them out maybe and the guy starts bending his knees in exactly that's exactly what i want especially with flexible guys maybe he's even holding his foot trying to be flexible well that's why i don't stretch him out and the crotch ripper right so all we're going to do we're going to shoot through this leg in between under here and i'm just going to hook back on my heel and i'm gonna make sure i step over with my right foot over my ankle right here now at this point that's already a calf slicer if i just hip in right there i can get the tap you want to be a little bit meaner you just grab the toes pull them down and then finish from there that's called the sneaky kamikaze even if he has his legs stretched out right here a lot of times just bending my own knees and then bringing this leg over right a lot of times you don't have to go over you can also go under and around the main thing is leg curl how strong is your leg curl right there the power of kicking your heel towards your butt and bending that leg look at my footwork right here i step over i'm not cross under i step over with that bottom leg now he's feeling it a little bit i stretch up and then to just secure it i can use my left hand and pull that in there and i'll finish that cat slicer sneaky kamikaze style the sneaky kamikaze is essentially attacking with your legs right not making it obvious that you're trying to reach with that hand before you do any of that gripping with your hand you're doing all the work with your legs right that footwork and that's why we call this the sneaky kamikaze
