Okay, so let's look at the final Yoko Senkaku Kimura Dilemma. All right, so What's gonna happen here, it's the highest level guys, is that she initially has her hands locked and She realizes if I get to the far arm, I'm gonna hit Yoko Senkaku and she's gonna get strangled So what everyone does is they pull that far arm away from us They tuck the hand Sorry, they tuck the hand Inside the thigh and now what everyone Realizes is that if I can put a bend in their hand, they're gonna get finished with the Kimura So what do they all do say? Okay, the hand can't get put behind the back They lock the hands once again, and then what do you have access to the far arm? Okay, you're always going to have Access to your partner's forearm or access to your partner's near arm. Okay This is a position where? Your partner's pinned on bottom position and She's forced to give you one or the other. This is why the dilemma is so It's so great from here because your partner has to either keep the hands locked and deny the Kimura But give you the forearm to finish Yoko Senkaku or unlock the hand deny the strangle and give you the ability to finish the Kimura Okay, there's there's no way around this. Okay, so you play a dilemma game of First I'm gonna go to lock the Kimura if we can put the hand behind our partner's back great We do that If not And we step inside of our partner's leg And we threaten to fall down to Yoko Senkaku if your partner unlocks the hands to fight the elbow back to the inside We go Kimura We put the hands behind the back because the hands then are unlocked If not, we fall down to Yoko Senkaku where we are now and we find that we play a second dilemma Between the far arm and the near arm If the forearm is available, we go Yoko Senkaku and we finish every time if the near arm is available We go Kimura and we finish every single time so either way you have either a strangle or a Kimura obviously if you had to pick I pick Yoko Senkaku because you're gonna strangle someone and You're gonna finish them regardless whether or not they tap with the Kimura you can break someone and Their elbows probably gonna dislocate and stay dislocated So the match is probably gonna be over but they can choose not to tap Okay, so if I had the choice, I always go Yoko Senkaku But if the Yoko Senkaku is not available and we go in we put the hand on the floor and we finish Kimura Okay, so that's the basic dilemma game between Yoko Senkaku and a Kimura now Let's look at what happens if our partner turns on top of us how we can go into another form of triangle Which is called Gyaku Senkaku the inverted triangle
